# CHIEN-SHENG CHIANG

+886 968-459-846 ⋄ b10902063@ntu.edu.tw ⋄ github.com/chiangcs

## EDUCATION

**National Taiwan University** *Sep 2021 - Present*

Bachelor of Science in Computer Science and Information Engineering
GPA: 4.14/4.3 Top 17%, Awards: Dean's List (2x)
Teaching Assistant: Robotic Perception and Learning, Fall 2025.
Relevant Course: Calculus (A+), Linear Algebra (A+), Probability (A+), Algorithm Design and Analysis (A+), Machine Learning (A+), Reinforcement Learning (A+), Investment (A+)

## PUBLICATION

**Chien-Sheng Chiang***, K.H. Tu*, J.W. Liao*, C.F. Chou, T.W. Ke. **"COT-FM: Cluster-wise Optimal Transport Flow Matching"**, Computer Vision and Pattern Recognition (CVPR), 2026.

**Chien-Sheng Chiang**, S.E. Park, H.T. Hsiao, B.G. Kim, C.W. Lin. **"Optimizing Dependent Task Offloading with Hop Constraints in Vehicular Edge Computing"**, Vehicular Technology Conference 2026 Fall (under review).

H.C. Liu*, K.H. Tu*, J.W. Liao*, **Chien-Sheng Chiang**, C.F. Chou, T.W. Ke. **"CNP-Flow: Unified Temporal Flow Matching via Conditional Noise Prediction"**, Neural Information Processing Systems (NeurIPS), 2026 (under review).

## RESEARCH EXPERIENCE

**Embodied Artificial Intelligent Laboratory** *Jan 2025 - Present*
*Research Assistant, Advisor: Professor Tsung-Wek Ke* *National Taiwan University*

- Proposed a cluster-wise optimal transport framework for flow matching that improves sample efficiency and generation quality in image synthesis and robot policy, improving FID by 12% on ImageNet.
- Designed a unified flow matching framework via conditional noise prediction for video prediction, interpolation and motion planning, achieving up to 23% FVD reduction on BAIR64 video prediction.
- Building an online reinforcement learning pipeline for real-world robotic manipulation on LeRobot.

**Cyber-Physical Systems Laboratory** *Sep 2024 - Jan 2026*
*Research Assistant, Advisor: Professor Chung-Wei Lin* *National Taiwan University*

- Developed a framework for dependent task offloading with hop constraints under partially connected edge servers, achieving a 17.8% average makespan reduction over existing methods, in collaboration with Prof. BaekGyu Kim at DGIST, Korea.

## WORK EXPERIENCE

**Avivid.ai** *Jul 2024 - Aug 2024*
*Software Engineering Intern* *Taipei, Taiwan*

- Developed a full-stack website to collect user preferences for the advertisement keywords.
- Trained a supervised model using collected user preferences to predict effective keywords in advertisements.

## SKILLS

| | |
|---|---|
| **Machine Learning** | PyTorch, Jax, NumPy, Scikit-learn, Pandas, Hugging Face, Docker |
| **Robotics** | MuJoCo, MuJoCo Warp, Isaac Gym, LeRobot, Unitree G1 |
| **Programming** | Python, C, C++ |
| **Domain** | Computer Vision, Robotics, Reinforcement Learning |
